Site guideline

~The map page~

The latest number of monitoring posts is displayed for each municipality.

Shows the detail information about the clicked point.

Lists the dose rates of the city, ward, town, or village.

Change the base map.

Move to the top page

Information on the entire area where the measurement point is installed is displayed. (Displayed only when air dose rate is selected)

Change the map area.

The screenshot shows the website interface for Fukushima Prefecture's radioactivity measurement map. At the top, there are navigation links for 'Top page', 'Site guideline', and 'Fukushima Pref. HP'. A search bar is present for 'Results of measurement of air dose rates'. The main map area displays numerous monitoring points (M) across Fukushima Prefecture. A pop-up window for '上桶売公民館' (Utsukigai Civic Hall) shows a measurement of 0.06 μSv/h on 2023/01/18 at 10:00. A legend at the bottom identifies monitoring methods: (M) Monitoring post, (P) Survey meter, (R) Real time dose measurement, and (C) The air dose rate a city measured. A time-series slider at the bottom allows viewing results from 2022 to 2024. On the right, a sidebar provides detailed information for the selected point, including 'Point No.: 3655', 'Air dose rate: 0.06 μSv/h', and 'Direction, distance: West/South/West'. A 'See the graph' button is also visible.

Change the map zoom level.

Shows the results of radioactivity measurement when a point is clicked. If you check "add to favorites", it will be registered in favorites list and you can easily move to this point.

The time slider

You can view the measurement results in a time-series.
